Customization option With the + properties from oils

YOUR BIOSOURCED FORMULA + OILS (2 IN 1)

A healthy and complete formulation.

The + of oils

WHY ADD OIL TO YOUR BIOSOURCED FORMULA?

Vegetable oils are essential beauty treatments. You are looking to take care of your nails. For this, nothing better than a vegetable oil to nourish your nails and soothe the skin around. All vegetable oils will come to nourish the nails and the skin: wheat germ oil, rosehip, avocado, nigella ... Thanks to the fatty acids they contain.

On the other hand, there are some that are more suitable for particular areas and that are soothing. For example for feeding the cuticles, jojoba oil and sweet almond oil are excellent. Castor oil in particular, thanks to its high content of vitamin E, is the most effective for fortifying those who are fragile and brittle. Sweet almond oil also helps to harden and moisturize the nails.

Many possibilities :

- Aloe Vera
- Linseed oil
- olive oil
- Orange oil
- Orchid oil
- Blueberry oil
- Camellia oil
- Poppy Oil
- Macadamia oil
- Walnut oil
- Peony oil
- Musk rose oil
- Sweet almond oil
- Argan oil
- Tea tree oil
- Vegetable Keratin
- Borage oil

ROOM FOR CREATIVITY

Care oils

Instant Dry Sèche vite Biosourced

FORMULA C21-02584

Eco-certified formula

Your manicure is shiny, it lasts longer and dries in a few minutes.

We like:

- Its ultra glossy shine
- Respectful of nature
- Its contribution in nutrition with sweet almond oil & vitamin E.

Instructions for use

Apply a layer after each varnish application.

Psiflow 6

Based on hydrogenation, this very sweet emollient offers the same volatilities, viscosities and touches as the references.

Cetiol ultimate

The CETIOL Ultimate is a 100% emollient of natural origin with ultra-fast, non-polar and very dry spreading, ultralight and volatile touch.

Sweet almond oil

Briten nails are the struggle of many women today. Sweet almond oil is very effective in remedying this thanks to its richness in iron and vitamins.

Tocopherol

Vitamin E
